# MaxiTrack®

THE WORLD'S MOST HEAVY DUTY, MAN-HANDLEABLE MATTING

## The most heavy duty man-handleable matting system available!

The new MaxiTrack system is a totally fresh approach to temporary ground protection. By using 1.8 x 0.9m mats with a 23mm core, the weight has been kept to a man-handleable 40kg. Alternatively, the mats can be kept joined in fours, and craned into position as 3.6 x 1.8m mats.

Overlapping flanges provide maximum support and mud suppression, with unique slotted joints to cope with heat expansion on large areas.

Provides smooth standing on rough terrain

Simple to install by hand

Can be crane installed in fours

# MaxiTrack®

THE WORLD'S MOST HEAVY DUTY, MAN-HANDLEABLE MATTING

MaxiTrack is packed in stillages for efficient storage and logistics

## OCTAGRIP™

OctaGrip tread underneath provides optimum grip on slippery ground

MaxiTrack mats have a 23mm thick core with treads on both sides

OctaGrip treads on underside interlock with the spaces between the SmartGrip tread on top, to hold mats firmly together for safe storage and transport

40kg mats are easy to install by hand

Use for helicopter landing pads, and logistics depots

## SMARTGRIP™

Slotted joiner holes allow for heat expansion

The SmartGrip tread pattern is designed for exceptional grip in all directions and is suitable for pedestrians and wheeled or tracked vehicles

Lapped flange joints provide a rigidly supported continuous roadway for maximum stability and minimum mud ingress
