## THE HAUL ROAD CHALLENGE

### Please share your insights...

We're looking to develop a model to explore the true financial and environmental costs of temporary stone roadways and/or stone roads for temporary access which may be subsequently left.

We are also keen to understand what are the operational challenges such as storage, logistics, local environmental impact?

Can you share any insights in terms of overall costs per square metre for installation, maintenance and remediation, and also what alternative solutions are considered when exploring this option?

We would love to hear from contractors, consulting engineers and other experts in this field.

Please email [info@ground-guards.co.uk](mailto:info@ground-guards.co.uk) or call +44 (0)113 267 6000.

*Thanks*
