

### The Location:

Hampton Court Palace, England

### The Requirement:

A 30 week renovation project was due to take place at the beautiful and historic Hampton Court Palace.

A temporary solution was required to safely divert visitors away from the building works and across a lawned area.

### The Solution:

Ground-Guards recommended FastCover as a cost-effective, high quality solution.

These versatile flooring mats, made from 100% recycled PVC, are strong and durable, with interlocking lips for a smooth, safe join.

Quick and easy to install, and with an anti-slip surface to prevent trip hazards, FastCover is the perfect mat to create a good-looking, tidy, temporary pedestrian footpath.

### The Outcome:

The client was delighted with the end result:

"The mats fit together really well. We're very pleased!"
