

### The Location:

Brighton Beach

### The Requirement:

The Brighton Big Screen team were preparing to entertain thousands of revellers over a five week period at their annual outdoor film festival, located on Brighton beach. But the team realised – late in the process - that additional ground protection was required to satisfy strict health and safety regulations, so that partygoers could safely enjoy the fun and games taking place on the beach, even if bad weather came.

### The Solution:

Ground-Guards to the rescue! MultiTrack mats are perfect as a walkway for large crowds; strong, non-slip, easy to lay. We loaded up our wagons and had the mats delivered down to Brighton and installed within 24 hours. No fuss, no problem...

### The Outcome:

A successful event and a relieved event organiser:

“We honestly could not have opened without your track mats! We were tremendously impressed with your professionalism, flexibility and wonderful attitude – particularly with last minute additions to our order! It has been a pleasure to work with you on our successful event this year, and we look forward to working with you again soon.”
