# Re-site your homes without ground damage

**THE PUBLIC'S INTEREST IN GREAT BRITISH HOLIDAYS IS KEEPING CARAVAN AND HOLIDAY PARKS VERY BUSY.**

**BUT WHEN IT COMES TO SITING AND RE-SITING THESE HOMES, SAFETY AND EFFICIENCY ARE ALWAYS PARAMOUNT...**

**P**arks are installing new pitches, roads, and services. On top of this, the siting of new homes, and re-siting of existing ones continues unabated.

One particularly noticeable change

Siting this new 20 tonne two-part chalet home is made vastly safer and easier by the use of Ground-Guards.

in recent years has been the way that holiday and caravan parks throughout Britain have embraced the use of **Ground-Guards**. These lightweight

**MultiTrack is a portable, safe, strong solution**

plastic panels have now become recognised as standard equipment for siting caravans. This is largely due to the fact that they are virtually inde-

structible, and in fact, are **guaranteed unbreakable by vehicles of up to 50 tonnes**. This obviously makes them ideal for safely manoeuvring heavy caravans around on sites without damaging the turf.

**Ground-Guards** are made from environmentally friendly 100% recycled plastic. They are compression moulded at very high temperature, and under great pressure, which gives them their incredible strength and durability. They range in sizes from 8' x 4' down to 6' x 2', and are available with different tread pat-

terns to suit a whole range of uses. The original patented tread pattern with heavy cleats gives the **Ground-Guards** extra rigidity and traction.

Their light weight, ranging from just 15 kgs for the 6' x 2', up to 39 kgs for the 8' x 4' panels means that they can be easily set out by just one or two persons, without the need of a Hiab lorry. A range of special joining clips enable them to be quickly coupled together without tools, to

Ground-Guards provide the needed ground protection when concreting.

form semi permanent roadways and paths.

Caravan parks all over the country have stated that without doubt, **Ground-Guards** are one of the best and most versatile items of equipment they have ever purchased.
